👤 PROFILE

I am a passionate developer from Cali, Colombia, currently a sixth semester systems engineering student.

I stand out for my strong communication skills, adaptability to diverse work environments, and professional attitude. I enjoy working in teams, learning new technologies, and bringing real value to every project I work on.

💼 PROFESSIONAL EXPERIENCE

Backend Developer at CodeLiance

2025 February — Present

- Support in the systematization and automation of the information on administrative and documentary processes

TechNova Solutions – Backend Developer

2024 April — November

- As part of the backend development team at TechNova Solutions, I contributed to building scalable web platforms, including a SaaS application for residential management. My role involved designing RESTful APIs with Node.js, Express, and Prisma, managing PostgreSQL databases, automating internal processes using Python and AutoHotKey, integrating workflows with Google Workspace, and actively participating in architectural decisions and system deployments.
