PROFESSIONAL SUMMARY

Software Engineer with a security-first mindset, Cisco Networking Academy verified in Ethical Hacking and Introduction to Cybersecurity, with hands-on experience implementing authentication and access-control systems — JWT, bcrypt, and role-based access control — across production applications. Backend development background provides practical understanding of common web application attack surfaces: API design, session management, and input validation. Vice President of the IEEE Computer Society at Universidad Santiago de Cali, promoting technical culture and security awareness on campus. Actively growing toward a Cybersecurity/Ethical Hacking specialization, combining hands-on development experience with a systematic, security-conscious approach to building software.

FEATURED PROJECTS

Urbanix — Residential Community Management SaaS

NestJS 11 Prisma PostgreSQL JWT RBAC

- ▶ Designed a multi-role access-control model (admin, resident, superadmin, security staff) enforced across 25+ backend modules to segment sensitive resident and financial data by role.
- ▶ Secured REST APIs with JWT-based authentication for a production SaaS platform serving multiple residential complexes.

Client project — Codeliance

CDGLOBOS — Sports Club Management System

NestJS Prisma PostgreSQL JWT Authentication

- ▶ Implemented JWT-based authentication for a player self-service portal and an administrative panel with separate access levels.

Client project — Codeliance

USConnect (Campus Circle) — University Social Networking App

NestJS 10 · Prisma · JWT/Passport · bcrypt

- ▶ Implemented authentication with bcrypt password hashing and Passport/JWT session handling for a student-facing social platform.
- ▶ Enforced business rules server-side (permanent likes, mutual-match gating for chat access) to prevent client-side tampering of core app logic.

DraAF — Medical Clinic Appointment Platform

Node.js · Express · TypeScript · JWT · Zod

- ▶ Built JWT-based role authentication (Admin/Patient) with strict Zod schema validation on all API inputs to reduce injection and malformed-data risks.

PROFESSIONAL EXPERIENCE

Backend Developer — Codeliance

Feb 2025 – Present

- ▶ Support the systematization and automation of administrative and documentary processes, applying access-controlled workflows across client platforms.

Backend Developer — TechNova Solutions

Apr 2024 – Nov 2024

- ▶ Designed RESTful APIs with Node.js, Express, and Prisma over PostgreSQL, participating in architectural decisions with attention to data integrity and access control.

EDUCATION

Computer Engineering (In Progress)

2023 – Present

Universidad Santiago de Cali, Colombia — Member, Comba Research & Development Incubator

CERTIFICATIONS

- ▶ **Cybersecurity & Networking:** Ethical Hacker — Cisco Networking Academy (Verified) · Introduction to Cybersecurity — Cisco Networking Academy (Verified)
- ▶ **Programming:** C# — Ademass Training & Development · Python — Ademass Training & Development
- ▶ **Databases:** Bases de Datos: Generalidades y Sistemas de Gestión — SENA (40h, 2025)

ACHIEVEMENTS & LEADERSHIP

- ▶ Vice President, IEEE Computer Society — Universidad Santiago de Cali (2025 – 2026)
- ▶ Active Member, ETH Cali — Web3 & blockchain hackathon participant (2026 – Present)
